MISSION 2

Make My Prompt Smarter with ChatGPT

Choose the starter prompt for your website from the Prompt Vault at the back. Then paste it underneath this prompt:

COPY THIS INTO CHATGPT

I am aged 8 12 and I am creating my first simple website. I will paste a starter website prompt below. Help me make it my own.

Ask me 5 fun and simple questions, **ONE AT A TIME**. Ask about:

- 1 My website name
- 2 My favourite colours
- 3 The content I want
- 4 The style or feeling I want
- 5 One special feature or idea I want to add

After I answer all 5 questions, rewrite my starter prompt into **ONE clear website-building prompt** that I can use with Netlify's AI website-building workflow.

Keep it simple, mobile-friendly, safe and age-appropriate. Do not add logins, payments, databases, private messaging or complicated backend features. Do not ask me for my full name, address, school, phone number, email, exact location or other private information.

Here is my starter prompt:
